2020 COS FORUM

November 10-12, 2020 | COS Virtual Events Platform

Sponsorship and Exhibit Prospectus
The work of the problem-solvers of our industry is never done.
The COS Forum has been an annual event since 2013. 2020 will be a different COS Forum compared to past years, but one that is right for you. What will be the same is COS bringing together high-level operators, drilling contractors, service companies, academia, and regulators together to facilitate collaboration and drive continual improvement. The 2020 theme is “Navigating the Changing Safety Landscape.”

We are doubling down on innovation, introducing the COS Virtual Events Platform, allowing us to provide a compelling online experience incorporating the latest technology and API’s deep experience in engaging communities online.

**On the conference program side,** we will have a mix of live and pre-recorded presentations, live Q&As, polling, and additional features the vibrant technology allows. The content-focused work of the volunteer planning committee, made up of API member company subject matter experts, is what keeps our attendees coming back. That same planning committee is designing a strong 2020 program, including a Pandemic Response track.

**On the virtual exhibition side,** you will be given login access to create your own virtual booth. Our platform has built-in scanning tools with a fully integrated virtual badge scanner and lead retrieval functions. Depending on your participation level, features can include the ability to upload presentations, .pdf flyers, videos, and links to your website. You can also access a friendly, powerful leads dashboard from your laptop or mobile phone, giving you real-time profile information on the leads as they are collected. Delegates can also easily “request information” from exhibiting companies, sharing their contact information, just like having their badge scanned at a live event. You will also be able to see who stopped by, for how long, and what they downloaded. A live Q&A feature, and most importantly, 1:1 Zoom meeting scheduling; Pre-schedule multi-person video conferences for informal “Birds of a Feather”-type meetups, allowing attendees to connect with your exhibit staff face to face.

All of this content, including the virtual exhibition, will live on the COS Virtual Events Platform for one year following the event.

**You can participate with confidence,** knowing that you will reach the loyal, dedicated high-level audience this COS event is known for.

To purchase, simply visit the exhibitor information tab at [www.centerforoffshoresafety.org/cos_forum_2020](http://www.centerforoffshoresafety.org/cos_forum_2020)
